T020 - Trach: Go Bag Supplies

Policy Date:

Subject:

Trach: Go Bag Supplies

Non-vented trach patients being transported throughout the hospital should be accompanied by one of the following: a registered nurse, a respiratory therapist, a physician, a Child Life therapist, PT/OT, or acceptable observer. (An acceptable observer would be a guardian or caregiver who was trach trained.) The ACH team member or guardian/caregiver accompanying the patient should also be responsible for picking up the patient and remaining with the patient when being transported throughout the hospital.

- * All trach bags should include a Tracheostomy Home Care Book supplied by ENT.
- * All trach bag supplies should include: mucous trap, 10 addipacks, 500 mL sterile water, Humid mini vent (trach vent), tube of KY jelly, blunt tip scissors, and stethoscope.
- * All bags for patients with pediatric sized trach tubes should have a roll of trach tape.
- * All bags for patients with adult sized trach tubes should contain Dale velcro trach ties.

Specific supplies per trach tube size:
